

2026 PLANNER

User Guide

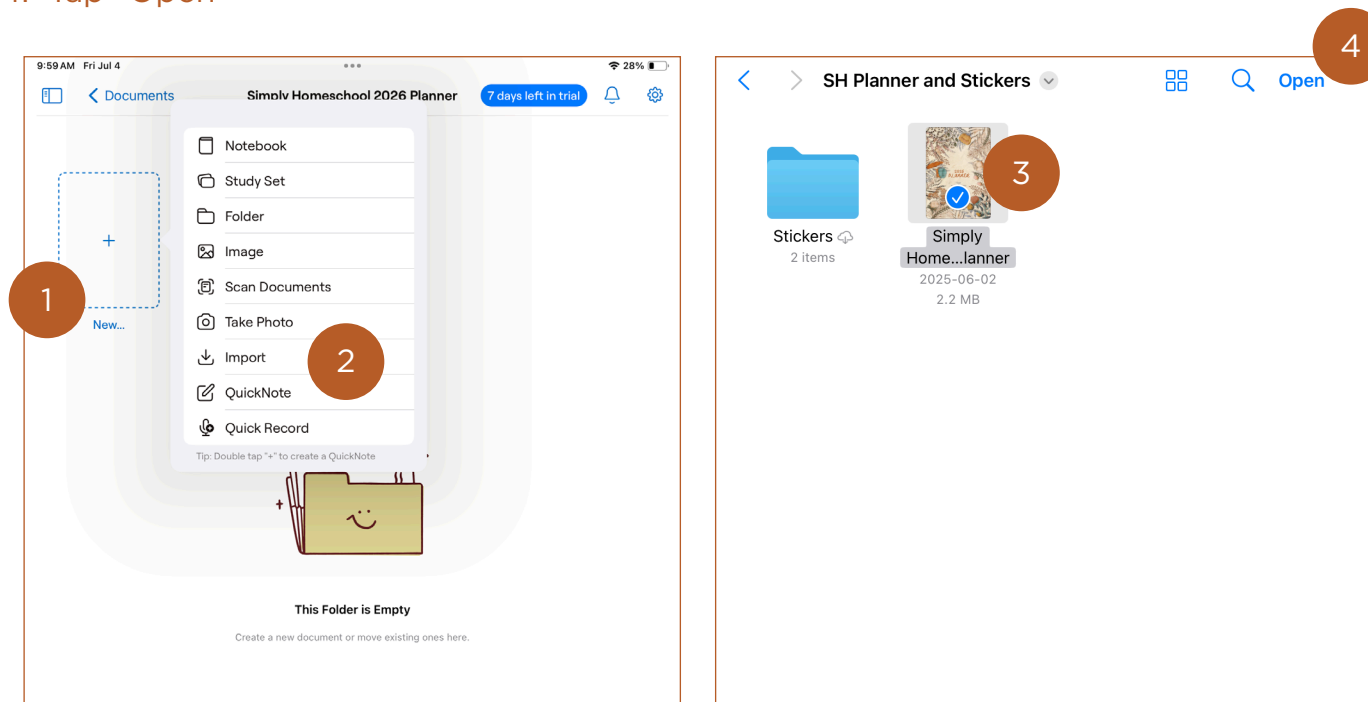

simply homeschool

Getting Started

Importing your Simply Homeschool 2026 Planner into GoodNotes

In the GoodNotes app:

1. Tap “New”
2. Tap “Import”
3. Locate and select the file
4. Tap “Open”

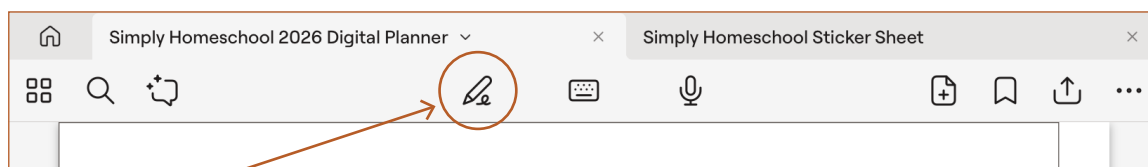

How to use the Hyperlinks

The Simply Homeschool 2026 Digital Planner includes many convenient hyperlinks embedded into the planner document to help you easily navigate to different pages within the planner.

These include:

- Month tabs down the right side of entire document
- Week links within each monthly spread
- Everything on the Index page

In order to use the hyperlinks, you need to ensure you are in “Read Only” mode.

To enter Read Only mode, make sure this button is not selected.

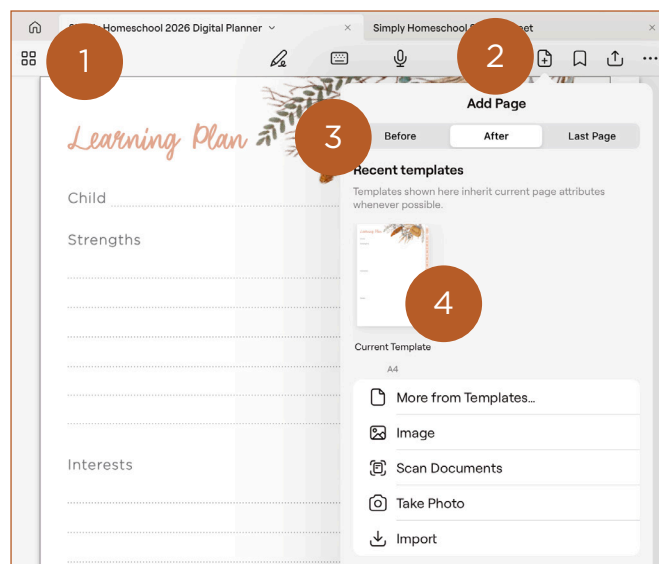

Getting Started

Duplicating Pages

One of the main differences between our printed and digital planners is that the digital planner includes only one set of the Learning Plan, Big Picture and Just Good Books pages. The good news is that you can easily duplicate any page within the planner if you need more!

To duplicate a page:

1. Navigate to the page you wish to duplicate (easiest to do via the thumbnail view, which is the little group of four squares in the top left of the screen)
2. Tap the “Add Page” button
3. Choose where you want to add the new page
4. Tap the “Current Template”

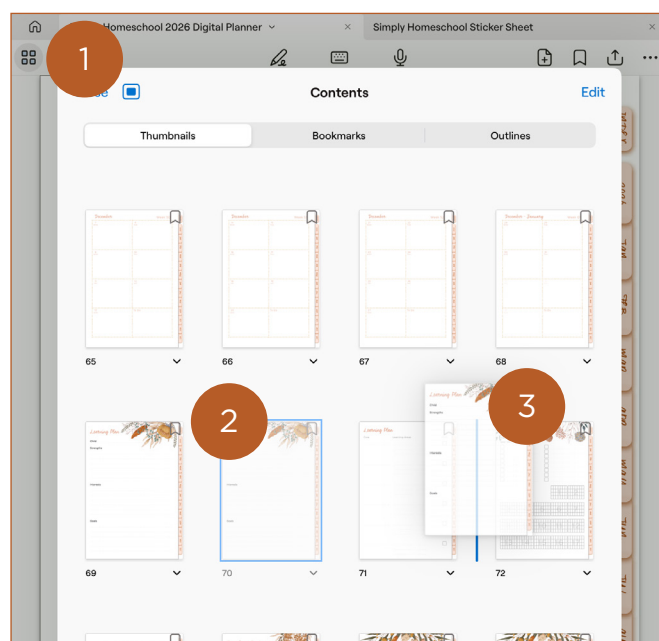

Rearranging Pages

After you've duplicated pages, you may need or want to rearrange the order of some of the pages in your planner.

To rearrange pages:

1. Tap on the thumbnail view (the little group of four squares)
2. Tap and hold the page you wish to move
3. Drag to where you want to move it and let go once you see the blue line appear in the new location.

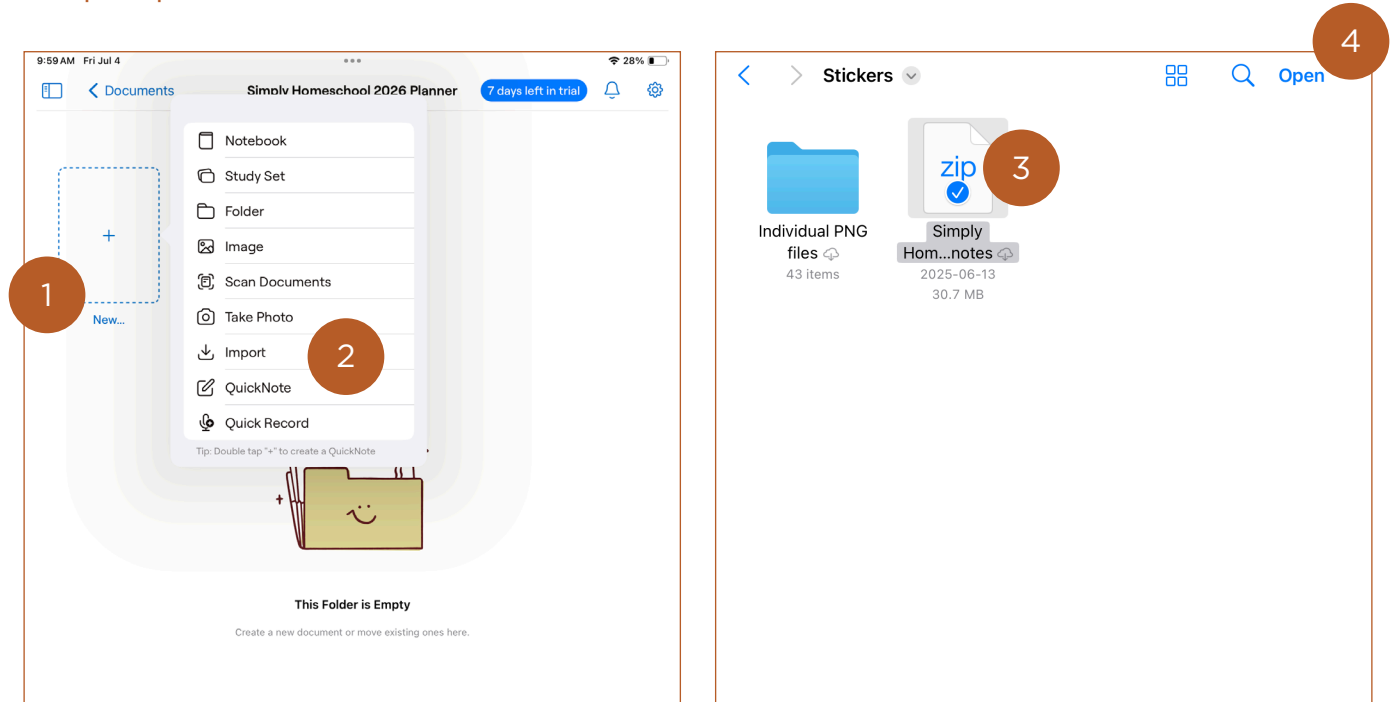

Digital Stickers

Importing your Simply Homeschool Digital Sticker sheet into GoodNotes

Follow the same process as you did to import the planner:

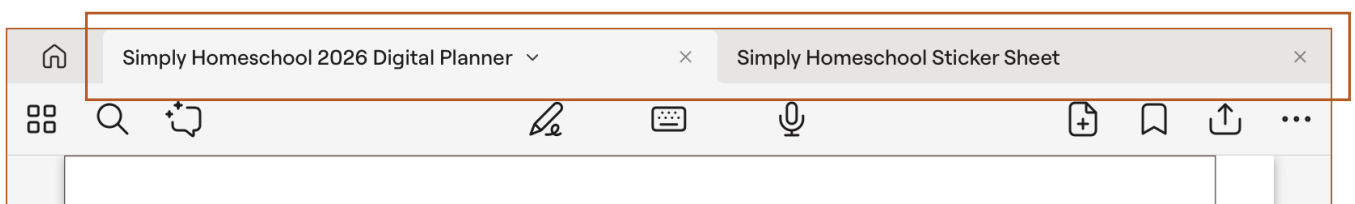

1. Tap “New”
2. Tap “Import”
3. Locate and select the file
4. Tap “Open”

How to use the Digital Sticker Sheet

The Digital Sticker Sheet is a .goodnotes file and, as such, the stickers are all formatted to be easily copy and pasted into any other open document within GoodNotes.

When both the planner and sticker sheet files are open in GoodNotes, it is easy to tap between the files. Open files display side-by-side across the top of the screen.

Digital Stickers

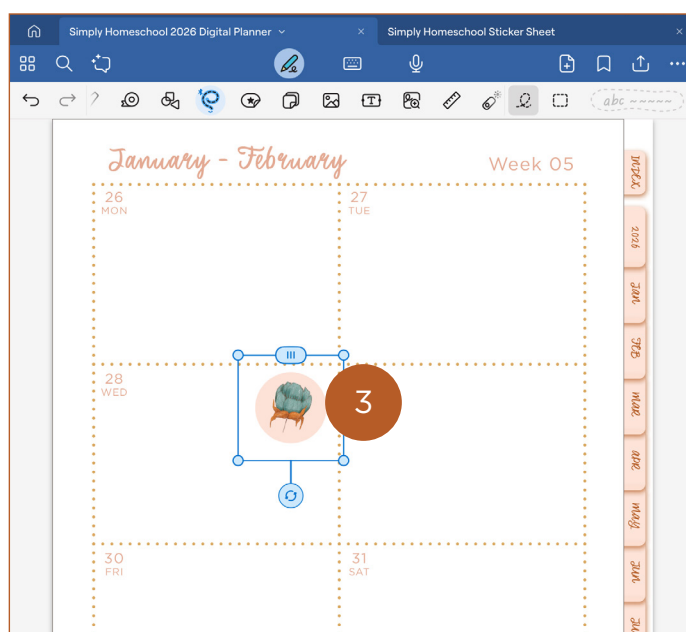

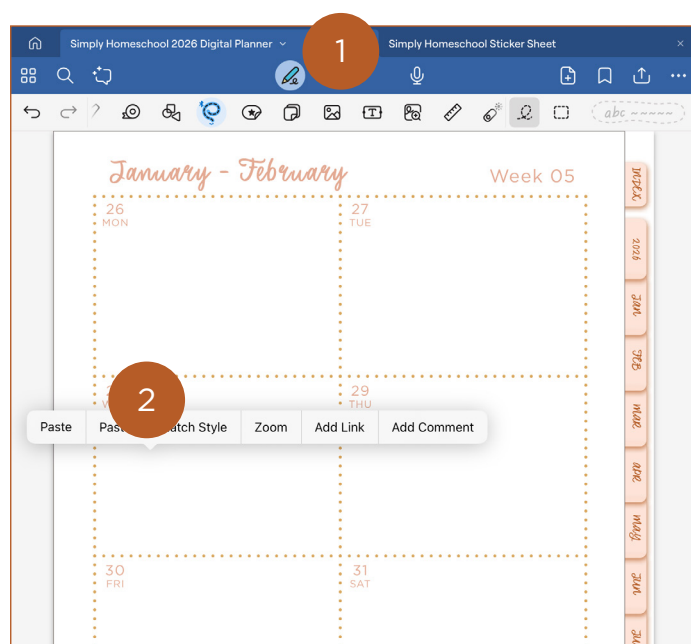

Copying Stickers from the Sticker Sheet

1. Tap the pen button to enter "Edit" mode
2. Select the lasso tool from the tool bar
3. Lasso the sticker you want to use with your stylus pen or finger (tip: you don't have to perfectly select the whole sticker!)
4. Tap on the lassoed sticker and tap the copy button in the pop-up tool bar

Pasting Stickers into the Planner

1. Switch over to the planner file.
2. Tap and hold on the page and then tap the paste button in the pop-up tool bar.
3. When the sticker has the blue outline, you can use the corners to change the size of the sticker and tap and hold anywhere inside the box to move the sticker around the page.

Digital Stickers

Importing Individual Stickers into the Planner

An alternative way to add stickers is by importing the individual PNG files directly onto the planner page.

1. Tap the picture icon on the tool bar.
2. Tap the camera icon.
3. Select "From Files"
4. Select the sticker you wish to use from the Individual PNG Files folder.
5. Resize and position it to your liking.
